SUMMARY

Frontend Engineer with 5 years of experience designing, developing, and optimizing scalable web applications using React.js, Next.js, TypeScript, Redux, and Vue.js. Proven expertise in building high-performance, responsive, and usercentric applications across SaaS, HRTech, Web3, and enterprise domains. Experienced in collaborating directly with clients, product managers, designers, and backend teams to translate business requirements into robust frontend solutions. Strong background in application performance optimization, code reviews, reusable component architecture, state management, and modern frontend development practices. Passionate about delivering exceptional user experiences while maintaining clean, maintainable, and scalable codebases.

EDUCATION

2016 – 2020 **Bachelors of Technology**
Maharishi Dayanan University

PROFESSIONAL EXPERIENCE

04/2025 – 02/2026 **Frontend Engineer**
Gurgaon, India *Sequifi*
Sequifi is a US-based HR and workforce management platform providing payroll, hiring, employee lifecycle management, and workforce administration solutions for organizations of various sizes.

- Optimized frontend architecture and application performance by implementing best practices in code efficiency, rendering, and resource management, significantly improving user experience and system responsiveness.
- Migrated legacy React.js modules to Next.js, enhancing maintainability, scalability, and SEO capabilities.
- Developed and enhanced critical business modules including payroll processing, employee management, and hiring workflows.
- Implemented drag-and-drop document management functionality, streamlining document handling processes for users.
- Integrated digital signature workflows to improve compliance and reduce manual processing efforts.
- Collaborated closely with product managers and backend engineers to deliver scalable and business-critical features.
- Contributed to architectural discussions and frontend best practices to ensure long-term maintainability of the codebase.
- Technologies Used: Next.js, React.js, Redux, TypeScript, Tailwind CSS

07/2021 – 04/2025 **Software Engineer**
Noida, India *Ongraph Technologies pvt limited*
Worked on multiple client-facing projects across Web3, SaaS, enterprise applications, and consumer-facing platforms.

- Developed and maintained scalable web applications using React.js, Next.js, and modern frontend technologies.
- Collaborated directly with international clients to gather requirements, provide technical consultations, and ensure successful project delivery.
- Translated business requirements into responsive and user-friendly frontend solutions.
- Conducted code reviews and enforced coding standards, improving overall code quality and maintainability.

- Worked closely with UX/UI designers to deliver visually appealing and highly interactive user interfaces.
- Optimized application performance through efficient state management, lazy loading, code splitting, and component optimization techniques.
- Participated in debugging, issue resolution, and continuous application enhancements.
- Mentored junior developers and provided constructive feedback during development cycles.
- Contributed to Agile development processes, sprint planning, estimations, and technical discussions.
- Technologies Used: React.js, Next.js, Vue.js, TypeScript, Redux, Tailwind CSS, Material UI, Bootstrap

PROJECTS

04/2025 – 02/2026

Sequifi

Sequifi Workforce Management Platform | Role: Frontend Engineer.

A comprehensive HR and workforce management platform enabling organizations to manage payroll, employee records, hiring pipelines, compliance, and workforce operations.

- Developed Arena modules supporting multiple user roles and permission levels.
- Built payroll management workflows integrated with employee attendance and time-tracking systems.
- Implemented drag-and-drop document management functionality.
- Integrated digital signature capabilities for document verification and approvals.
- Enhanced recruitment workflows and candidate pipeline management features.
- Tech Stack: React.js, Next.js, Redux, Tailwind CSS

03/2024 – 09/2024

Pirkx

Pirkx | Role: Frontend Developer.

Pirkx is a UK-based benefits platform providing financial, health, and lifestyle benefits to individuals and organizations.

- Developed multilingual user-facing features and language-switching functionality.
- Built personalized experiences for administrators, directors, and end users.
- Implemented drag-and-drop interfaces for benefits management modules.
- Developed advanced blog creation functionality with rich content editing capabilities.
- Worked extensively with React Hooks and Redux Toolkit to manage complex application state.
- Tech Stack: React.js, Redux Toolkit, Material UI

09/2024 – 12/2024

Rovi Social

Rovi Social | Role: Senior Frontend Developer.

A Web3 distribution platform focused on onboarding users into GameFi, DeFi, NFT, and digital asset ecosystems.

- Developed Telegram authentication and bot integrations.
- Built portfolio management dashboards displaying user balances and asset information.
- Created highly interactive landing pages and earning modules.
- Converted Figma designs and wireframes into production-ready applications.
- Optimized frontend performance and user engagement across key platform areas.
- Tech Stack: Vue.js, Vuex, Bootstrap

01/2023 – 11/2023

Blender Integration

Blender Integration Platform | Role: Frontend Developer.

Desktop-based application used for blueprint creation, architectural modeling, and 3D visualization workflows.

- Developed floating tool selection interfaces to improve design accessibility.
- Integrated backend services to track blueprint creation history.

- Built user-friendly desktop experiences using Electron.js.
- Collaborated with backend teams to implement workflow management features.
- Tech Stack: Electron.js, Flask

07/2022 – 12/2022

News App

News & AI Content Platform | Role: Frontend Developer.

Social content platform enabling users to consume news and create AI-generated content including blogs, images, videos, and articles.

- Implemented authentication using Google, Twitter, and Facebook through NextAuth.
- Developed server-side rendered pages using Next.js.
- Built CRUD APIs and content management workflows.
- Created highly interactive user interfaces focused on content creation and engagement.
- Tech Stack: Next.js, React.js, NextAuth

TECHNICAL SKILLS

React js	● ● ● ● ●	Next js	● ● ● ● ●
Vue js	● ● ● ● ●	Electron js	● ● ● ● ●
